Art Unit: 1724

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a system for controlling the supply of brine to a conditioning tank, classified in class 210, subclass 191.
- II. Claims 3-5, drawn to a method of operating a water treatment system that includes a pair of water softener tanks, classified in class 210, subclass 670.
- III. Claims 6-8, drawn to a mechanism for producing a fluid pulse in a conduit, in order to draw solution from a reservoir, classified in class 137, subclass 511+.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I could be used in another process, different from that of Group II. For example, this system could be used to regenerate a conditioning tank other than a water softener (e.g. a cation exchanger used to remove heavy metals from water). Alternatively, this system could be used with a single treatment tank, instead of the pair of tanks required by Group II (see claim 3, lines 1-2).

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the system of Group I does not require the specific mechanism for drawing

solution from a reservoir of Group III, as evidenced by claim 1 (i.e. element "b"). The subcombination has separate utility such as for dispensing a beverage in a fast food restaurant.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
